

Dear Hiring Manager:

I hired her Jessica Jenkins as a Junior Programmer five and a half years ago to help with my Engineering department at Squeaky Wheel Media. During her tenure with Squeaky Jessica reported to me and my Technology Director where she was responsible for the development of many large projects including the NY State Lottery and IHadcancer.com.

Jessica is a quick learner, reliable, dependable and a born problem solver. Her ability to understand the dynamics of both design and Technology have enabled her to become an incredible full stack programmer today with a long list of client success under her belt. Jessica multitasks effectively and was able to handle a high-volume workload. She consistently met or surpassed her job requirements and was one of our strongest members on a multi-national team.

Of important value to me as a business owner who concentrates on culture and office environment was Jessica's team player mind-set, enthusiastic embrace of our office culture, and her ability to work with everyone in a highly stressful environment. I regularly received unsolicited praise from fellow employees on Jessica's outstanding level of commitment, assistance and follow-through.

Jessica has my highest recommendation, and I am happy to furnish more details if you would like additional information.

Sincerely,

Anthony Del Monte

President

Squeaky Wheel Media
